# Class Size 2006-2007

---

## Introduction

Class size reduction for the early elementary grades remained a state goal in 2006-2007, continuing efforts initiated by the Iowa Early Intervention Block Grant Program (House File 743) in 1999. Funding was allocated in 2006-2007 towards reduction of class sizes for kindergarten through third grade. Funding remained at \$29.3 million in FY 2007 unchanged from FY 2006 (see Table 1). Iowa's class size reduction goal established in Iowa Code Chapter 256D is 17 students per classroom for basic skills instruction.

Table 1

### STATE CLASS SIZE REDUCTION ALLOCATIONS FOR IOWA PUBLIC SCHOOLS

Fiscal Year	State Allocation
FY 2000	\$10 million
FY 2001	\$20 million
FY 2002	\$30 million
FY 2003	\$30 million
FY 2004	\$29.3 million*
FY 2005	\$29.3 million
FY 2006	\$29.3 million
FY 2007	\$29.3 million

\*Note: The FY 2004 appropriation was reduced as a result of an across-the-board cut after the initial appropriation and then received a partial restoration of funds.

## Methodology

Public school districts report the number of kindergarten, first, second and third grade classroom sections, students, teachers, and aides by building during the Fall Basic Educational Data Survey (BEDS). Special education teachers and aides are not included in the reporting. Physical education, art, music and other “specialty” teachers are also excluded from the teacher count.

Some districts utilize multiage classrooms for their K-3 students. For example, a classroom may combine first and second grade students in one room. Districts report these combination classrooms as grade level ‘Other’ on the Class Size submission but these classrooms are not included in this report.

The Department of Education calculated average class size for kindergarten through third grade at the district and state level. Average class size equals the number of students divided by the number of classrooms for each grade level.

$$\text{Average Class Size} = \text{Number of Students} / \text{Number of Classrooms}$$

Since average class size uses the number of classrooms as the denominator, adding additional teachers to a classroom does not lower the average class size for that grade level. The use of classroom aides also does not reduce average class size at the district or state level.

## Findings

This report provides class size data from 1998-1999 to 2006-2007 for kindergarten through third grade. Average class size increased in 2006-2007 for first, second and third grades and decreased for kindergarten compared to 2005-2006 (see Table 2 and Figure 1). The first and second grade averages reached their second highest levels since the start of the class size reduction efforts in 1998-1999. The third grade average was at its second highest level since 1999-2000. Despite the increases, average class size remained below 20 students for kindergarten and first grade in 2006-2007. Third grade continued to show the highest average class size per classroom of the grades examined, at 20.8 students per classroom for 2006-2007, and remained above 20 students in each year studied.

The increase in average class size in 2006-2007 continued the trend in recent years. Average class size declined for kindergarten through second grade from 1998-1999 through 2001-2002 but increased in each of the subsequent years with the exception of kindergarten in 2006-2007. Third grade showed a decline from 1998-1999 through 2002-2003 but experienced alternating increases and decreases in the following years.

Smaller districts were more likely to meet the state goal of 17.0 students per classroom than larger districts in 2006-2007. The average class sizes for kindergarten and first grades were at or below 17.0 students per classroom for the <250, 250-399, and 400-599 enrollment categories in 2006-2007. The <250 and 250-399 categories were below 17 students for third grade and the <250 category was below 17 students for second grade in 2006-2007.

The larger districts were more likely to show the highest average class sizes in 2006-2007. The 2,500-7,499 and 7,500+ enrollment categories experienced average class sizes of 21 or more for first through third grade in 2006-2007. The average class size for these enrollment categories remained above 20 students per classroom for the past five years.

The percentage of first, second and third grade classrooms above the state goal of 17 students per classroom increased in 2006-2007. For example, the percentage of first grade classrooms above 17 students went from 72.6 percent in 2005-2006 to 73.4 percent in 2006-2007. The percentage of kindergarten grade classrooms above the state goal decreased to 68.4 percent in 2006-2007 from 72.1 percent in 2005-2006.

Third grade showed a higher percentage of large classrooms compared to K-2 in 2006-2007, with 82.0 percent of third grade classrooms above 17 students per class. Although the third grade percentage was the highest, it was down compared to the 1998-1999 level of 87.4 percent. In comparison, kindergarten experienced 68.4 percent of classrooms above 17 students in 2006-2007 down 3.4 percent from 71.8 percent of classrooms in 1998-1999 (see Table 8).

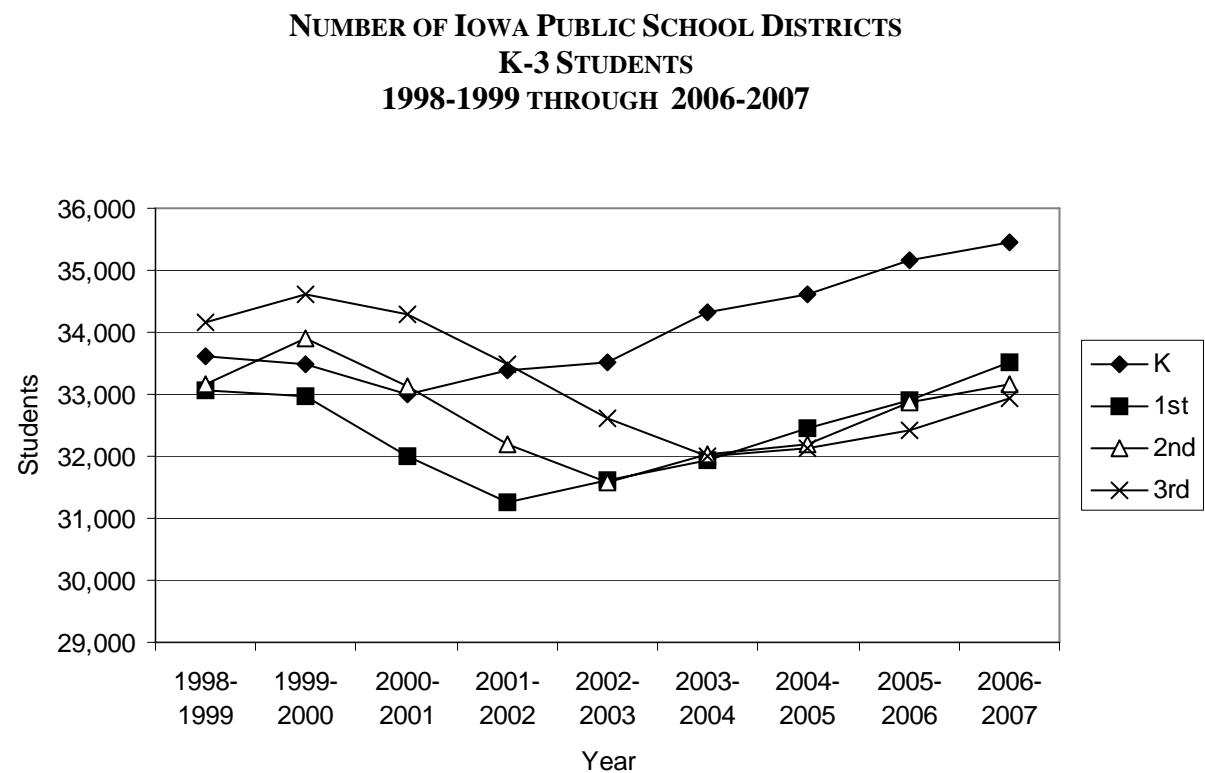

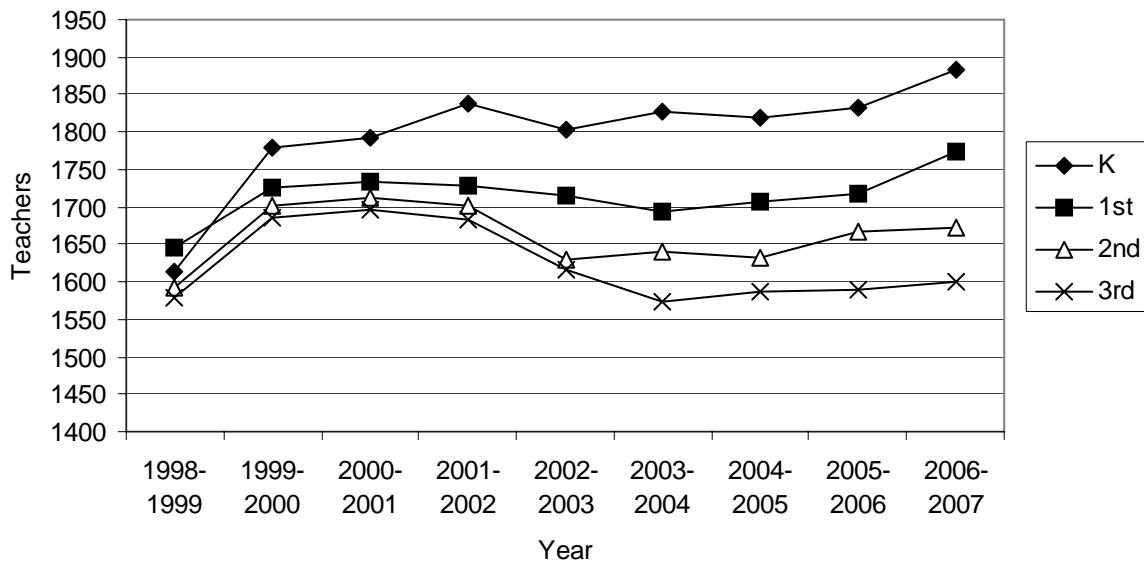

Figure 4

**NUMBER OF IOWA PUBLIC SCHOOL DISTRICTS

1998-1999 THROUGH 2006-2007**

The growth in the number of classrooms and teachers has outpaced the growth in the number of students for each grade level from 1998-1999 to 2006-2007 (see Figures 2-4). For example, the number of first grade students increased 1.3 percent since 1998-1999 but the number of first grade classrooms increased 4.5 percent during the same period.

Declines in average class size from 1998-1999 to 2006-2007 outpaced the declines in enrollment during the same period for kindergarten and first grade (see Tables 9 and 10). During this period, average class size declined 3.6 percent for kindergarten while enrollment increased 5.2 percent.

## Expenditures

District expenditures decreased slightly in FY 2006 to \$28,634,979 with salaries consuming the largest percentage of the total. Purchased Services, Supplies, Equipment and the Other categories were below 1.0 percent each (see Table 11 and Figure 5).

In FY 2006 the largest districts (+7,500) spent the smallest percentage of early intervention funds on staff salaries at 74.83 percent. Small districts in the <250 and 250-399 enrollment categories spent the highest percentage of funds on staff salaries, both at almost 82 percent, yet paid fewer benefits. The very smallest districts utilized supplies the most in FY 2006 at nearly 4.00 percent.
